

Data Dictionary

Primary sheet	Updated HR Dataset
Unit of analysis	One row per employee record
Row count	3,876
Field count	39
Workbook sheets	HR Dataset, Summary, Notes
Geographic coverage	Australia only: Melbourne, Sydney, Brisbane, Adelaide
Currency	Australian dollars (AUD)
Scale convention	Most people metrics use an ordinal 1-5 scale where 1 = low and 5 = high

Scale reference

Scale	Applies to	Interpretation
1-5	Inclusion Index, Wellbeing Index, Development Index, Work Life Balance, Job Satisfaction, Performance Rating, SDG Score	1 = very low / poor, 2 = low, 3 = moderate, 4 = high, 5 = very high / strong
0/1 flag	Hired Flag, Terminated Flag, Active Employee	1 = yes / present, 0 = no / absent
Yes/No	Flexible Work Arrangement, Attrition, Aboriginal and Torres Strait Islander identification	Binary categorical indicator

Key derivation logic

Derived field	Rule or formula	Analytical use
Active Employee	Hired Flag - Terminated Flag	Use to count currently active staff; active = 1, terminated = 0
Current Employee Status	Derived from termination state	Convenience label for filtering active vs terminated records
Attrition	Yes if employee is terminated; otherwise No	Useful for churn, exit pattern, and retention analysis
Total employment cost	Yearly Base Salary (AUD) + Oncosts (AUD) + Super (AUD)	Recommended for remuneration and workforce cost analysis
SDG Score	Rounded composite of Inclusion Index (35%), Wellbeing Index (25%), Development Index (20%), and Job Satisfaction (20%)	Internal social sustainability proxy linked to decent work, inclusion, capability, and employee experience

Identifiers and location

Field	Definition	Type / allowed values	Notes for analysis
Employee ID	Unique employee identifier in text form.	Text ID	Format similar to E100081. Use as the primary row key.
Employee Number	Secondary employee identifier in numeric form.	Integer	Operational identifier; also unique in the dataset.
Country	Country of employment.	Text; Australia	Constant field in this dataset.
State	Australian state of the employee office location.	Categorical; 4 values	New South Wales, Queensland, South Australia, Victoria.
City	City of the employee office location.	Categorical; 4 values	Adelaide, Brisbane, Melbourne, Sydney.
Office Site	Named operating site.	Categorical; 4 values	Melbourne HQ, Sydney Branch, Brisbane Branch, Adelaide Branch.
Office Type	Broad site category.	Categorical; HQ or Branch	Useful for comparing headquarters versus branch outcomes.

Demographics and workforce structure

Field	Definition	Type / allowed values	Notes for analysis
Age	Employee age in years.	Integer; 22-65	Deliberately scattered, with the largest concentration in the 35-45 range.
Age Band	Grouped age category.	Categorical; 5 bands	22-24, 25-34, 35-44, 45-54, 55-65.
Gender	Recorded employee gender.	Categorical; Male or Female	The workforce is male-dominated overall by design.
Identifies as Aboriginal and Torres Strait Islander	Self-identification field for Indigenous representation analysis.	Categorical; Yes or No	Use for inclusion, recruitment, satisfaction, and SDG analysis.
Department	Functional business area.	Categorical; 6 values	Corporate Services, Customer Services, Operations, Sales, Sustainability & Community, Technology.
Job Role	Specific role title.	Categorical; 21 values	Use with Job Level and Department for role-level comparison.
Job Level	Role seniority band.	Integer; 1-4	Lower numbers indicate more junior roles; higher numbers indicate more senior roles.
Highest Education	Highest completed qualification.	Categorical; 4 values	Associate Degree, Bachelors, Masters, Doctorate.

Tenure, mobility, and work pattern

Field	Definition	Type / allowed values	Notes for analysis
Years At Company	Completed years of service with the organisation.	Integer; 0-34	Useful for tenure, retention, and pay progression analysis.
Hire Year	Calendar year of hire.	Integer year	Can be used for cohort analysis and recruitment trend views.
Years In Current Role	Years spent in the current role.	Integer; 0-32	High values may signal stagnation or role stability depending on context.
Years Since Last Promotion	Elapsed years since the most recent promotion.	Integer; 0-24	Useful for progression and advancement analysis.
Years With Current Manager	Years reporting to the current manager.	Integer; 0-26	Can be compared with satisfaction, wellbeing, and performance.
Training Sessions Last Year	Count of formal training sessions completed in the past year.	Integer; 0-6	Training exposure variable for capability analysis.
Flexible Work Arrangement	Whether the employee has a flexible work arrangement.	Categorical; Yes or No	Can be used to test links with satisfaction, absence, and retention.
Absence Days	Number of absence days recorded over the reference period.	Integer; 0-17	Use cautiously as a wellbeing and attendance signal, not as a direct productivity measure.

Employee experience and sustainability measures

Field	Definition	Type / allowed values	Notes for analysis
Inclusion Index	Composite perception score for belonging, fairness, and inclusion.	Ordinal 1-5	Higher values indicate stronger inclusion experience.
Wellbeing Index	Composite score for employee wellbeing and perceived health support.	Ordinal 1-5	Higher values indicate stronger wellbeing conditions.
Development Index	Composite score for learning, growth, and career development support.	Ordinal 1-5	Higher values indicate stronger development conditions.
Work Life Balance	Employee rating of work-life balance.	Ordinal 1-5	Higher values indicate better balance.
Job Satisfaction	Overall employee job satisfaction score.	Ordinal 1-5	One of the central target metrics in the case study.
Performance Rating	Managerial or formal performance assessment score.	Ordinal 1-5	Used to explore achievement, bias, progression, and reward patterns.
SDG Score	Internal workforce sustainability proxy score.	Ordinal 1-5	Do not treat as a literal score against all 17 SDGs. It is a people-focused social sustainability composite.

Compensation, employment state, and exits

Field	Definition	Type / allowed values	Notes for analysis
Yearly Base Salary (AUD)	Annual base salary before oncosts and superannuation.	Currency; AUD 55,000-295,000	Gender pay gap is intentionally present within similar roles for teaching purposes.
Oncosts (AUD)	Employer oncost component associated with the employee.	Currency	Designed to be added to base salary and super for total employment cost.
Super (AUD)	Employer superannuation contribution.	Currency	Use with base salary and oncosts for cost analysis.
Hired Flag	Indicator that the employee was hired into the organisation.	Binary 0/1; always 1 in this dataset	Included so Active Employee can be derived as a simple flag.
Terminated Flag	Indicator that the employee has been terminated.	Binary 0/1	Primary churn flag.
Active Employee	Indicator that the employee is currently active.	Binary 0/1 (derived)	Derived as Hired Flag minus Terminated Flag.
Attrition	Text label indicating whether the employee has exited.	Categorical; Yes or No	Human-readable churn label.
Current Employee Status	Current employment status.	Categorical; Active or Terminated	Use for filters and summary views.
Termination Reason	Reason recorded for employee exit.	Categorical; 5 values or blank	Blank for active employees; populated only for terminated employees.

Reference tables

Office Site	City	State
Melbourne HQ	Melbourne	Victoria
Sydney Branch	Sydney	New South Wales
Brisbane Branch	Brisbane	Queensland
Adelaide Branch	Adelaide	South Australia

Termination Reason	Meaning
Poor Performance	Performance-related exit.
Family/Carer Responsibilities	Exit associated with care or family obligations.
Career Change	Voluntary exit for a new career direction or employer.
Restructure/Redundancy	Role removed or reshaped through organisational change.
Retirement	Exit associated with retirement from work.
